

# Additional Information on Global Youth Political Participation Index

Project: NDICI HR INTPA/2022/437-956 - Women and Youth in Democracy - WYDE CE

## Importing Content

About the possibility of aggregating and importing external posts/news in the above-mentioned section, it will be a recurring task by updating content frequently to upload and link activities of the Youth Democracy Cohort. Since the content will be mainly simple articles with text / image / video, a wordpress backoffice option such as a gutenber is what we need here. This section won't be connected with the charts section

## Data availability

At the beginning the data will be imported in large batches but since the countries will increase, there will be data added ad hoc whenever new data comes in. Therefore, the platform should envisage and facilitate the addition of more countries in an easy way.

## Budget range

The initial budget for the creation of the platform is around 20k.

## Visualization

The map should contain a filtering and sorting tool where variables can be selected by the user (e.g. country, categories).

By clicking the respective country on the map, the user should be able to see the score of the country, containing a hyperlink redirecting to the report for the chosen country.

Thematic comparison and regional comparison charts are also highly recommended.

## Deadline of the project

The pilot phase of the project ends mid/end of June 2024, therefore the final visualization with the data should be ready around the end of May. However, the intention is to add more data in the future and progress further the platform.
